

Game Instructions

Tic Tac Toe 3D

A game of tactics for 2 players.

Content : 1 game board, 32 light balls and 32 dark balls

This game requires concentration and tactical skill from both players. The basics of 3D Tic Tac Toe can be learned quickly, but it may take longer to really master this game. The more often you play, the easier you will find it to anticipate your opponent's moves and then outwit him or her.

The object of the game is to be the first player to form a horizontal, vertical or diagonal row with four balls of the same colour, while at the same time preventing your opponent from doing the same.

Preparations

Each player receives 32 balls of one colour. At the beginning of the game, the board is empty. The players take it in turns to place a ball on one of the wooden pegs..

Rules

- 1.) The player who first succeeds in forming a row of 4 has won the game and must draw his opponent's attention to this fact.
- 2.) If the player fails to notice that he has a row of four and the other player can form a row of 4 with the next move, then the latter has won.
- 3.) If all the balls have been placed without a row of 4 being formed, the game ends in a draw.

Enjoy your game and have fun !
